**current role, location and**  
**email address**

**Confirmation of your registration**  
**will be sent via email**

This learning is suitable for any allied health, nursing, medical and support staff working in rehabilitation, geriatric evaluation and management. It will provide an opportunity to workshop and share ideas, tools, resources and experience.

The aim of the Learning Program is to improve patient outcomes in Subacute Care (SAC) through the delivery of evidence based, coordinated care by embedding a culture of clinical excellence within SAC services and developing workforce skills and knowledge.

#### Aboriginal Person Centred Care Objectives:

- To increase cultural knowledge and understanding
- To positively impact the health and wellbeing of Aboriginal people through improving the skills of health professionals
- To engage staff with authentic stories of Aboriginal people's experience of healthcare providing insight to enhance the development of deep and lasting empathy for Aboriginal people
