

INFORMATION SESSIONS

Earlier Intervention and Family Support Services

All interested service providers, Aboriginal Community Controlled Organisations, and local invested community members are invited to attend an Information Session to hear about the new developments coming soon.

New Regional Service Model

A new Earlier Intervention and Family Support (EIFS) regional service model is coming to the South West, Pilbara, and East Kimberley regions. This model has additional service streams to better support families. The model includes opportunities for local service providers to join a strong community service network that links families into meaningful community supports.

The new regional service model will be commencing in the South West region in March 2023, and the Pilbara and East Kimberley regions in July 2023. The EIFS Team invite all interested parties to come along and hear about these new developments in your region

Information Session Schedule
