

Hepatitis C in Primary Care and Drug and Alcohol Settings Education Program

Developing a sustainable HIV, viral hepatitis, and sexual health workforce

Collaborating partners:

Date Saturday, 31 August 2019
Venue Quest Rockingham Apartment Hotel, 22 Flinders Lane, Rockingham WA 6168
Time 8:45am - 4:30pm (Registration from 8:30am)
Cost This course is free. Lunch and refreshments will be provided

People who inject drugs represent approximately 90% of newly acquired hepatitis C (HCV) infections. Clinicians in Drug and Alcohol settings play an important role in improving the health outcomes of people living with HCV and can reduce a patient's risk of developing advanced liver disease through early diagnosis, appropriate management of co-morbidities and treatment with new, curative, Direct Acting Antiviral medication (DAAs).

This course is designed to strengthen the capacity of clinical staff working in drug and alcohol settings or working with people who inject drugs to effectively test for, treat and manage HCV.

The course will be delivered in three parts:

- Online learning modules
- Interactive face-face workshop
- Resources and toolkits to enable confident prescribing of new Direct Acting Antiviral (DAA) medications for HCV

Learning outcomes:

- Describe the risk factors for HCV infection enabling effective screening and prevention education
- Demonstrate competence conducting and interpreting tests to diagnose HCV
- Recognise risk factors, clinical signs, symptoms and complications of liver disease
- Demonstrate understanding of DAA therapy for the treatment of HCV and competence in selecting appropriate therapy
- Describe recommended on-treating monitoring and post-treatment follow up protocols

This event is sponsored by Gilead. Sponsorship is governed by our Sponsorship Policy and the sponsor has no control over content, tone, emphasis, allocation of funds or selection of recipients. ASHM does not endorse or promote any sponsor's product or service.
