This learning is suitable for any allied health, nursing, medical and support staff working in rehabilitation, geriatric evaluation and management. It will provide an opportunity to workshop and share ideas, tools, resources and experience.

The aim of the Learning Program is to improve patient outcomes in Subacute Care (SAC) through the delivery of evidence based, coordinated care by embedding a culture of clinical excellence within SAC services and developing workforce skills and knowledge.

Aboriginal Person Centred Care Objectives:

- Increase cultural knowledge and understanding.
- Engage with authentic stories of Aboriginal people's experience of healthcare providing insight to enhance the development of deep and lasting empathy for Aboriginal people.
- Improve the skills of health professionals to provide person-centred care to Aboriginal people in a holistic, culturally safe way in a culturally compassionate environment.

TRACS WA may film/record/photograph this event for educational and promotional purposes. Please advise TRACS WA if you do not wish for your image and voice to be used in this way.
