

## **Public Health Education – New Live Style Living**

**Note for file Ken Lechleitner and Tyron Wallace**

**5<sup>th</sup> Feb 2018**

### **Safety:**

Today there was 40 odd men waiting and doing their own stuff. There was also issues of man stepping on razor blade last week, because, the razor was not dispose of correctly into the yellow sharp bin provided.

Bodily waste management needs more attention, in case of communicable diseases.

### **Increase in men at Ingkintja:**

This is very encouraging to see large number of men accessing the services, being provided by Ingkintja / Congress for men in general.

In having large numbers, comes with management issues and setting of rules for what men should be doing while using the facilities.

### **Observational:**

The large number of men was witnessed using the facility and services provided by Ingkintja.

In experiencing larger numbers of men waiting to using the services, presents a whole new challenge on resource.

1. More mirrors are needed for men to use and place to pack the mirrors way after use.
2. Not enough Washing Machine and solution could be hand washing troughs for men to wash cloth by hand. This processed was witnessed, where it created large volume of water at the back. This potentially creating a health risk of someone slipping.
3. Two or three more Washing Machine is needed
4. Two or four more shower block is needed
5. Creating an outdoor kitchen would go a long way in help men that wanting somewhere to cook there food.
6. New clothe line to be put up

### **Smoker smoking outside in the lane way:**

The men seem to be following the rule of smoking at the back some much better, creating a smoke free zone on the inside where health promotional talks are taking place.

### **Difficulty in talking or discussing health promotions:**

With large group and trying to have a small group discussion, was very difficult. Therefore this was use to asking for men to give their name to Terry during the week to help with putting up cloth line at the back where the sun shines. They could also look at put an outdoor kitchen in for use.
