Kronic's Profile

Kronic
Hey Aussie Kronic fans - nothing dodgy going on... we only found out about the ban today so just clearing out the last of our stock. It has to be gone by 2morrow close of business so we have 2 options... give heaps away for free or just dispose of it tomorrow. I know what we'd prefer! Up2 you if you want to order & take the chance.

BUY 1 GET 1 FREE ON ALL PRODUCTS PLUS SHIT LOADS OF FREEBIES WITH ALL ORDERS! :D

- Because Aus represents a huge chunk of the market, and also it could get banned at any time in NZ, these governments are unpredictable. about an hour ago
- I want some, no money but ive already bought heaps from yas so give me it for free about an hour ago
- want freebies how how about an hour ago
- that ban is legit bullshit. about an hour ago
- how do i buy it to australia? about an hour ago
- get the goodies going now please about an hour ago
- It's maybe coming from the Australian warehouse? about an hour ago · 1 person
- Aussie orders were always sent from australia other wise you woulda had to pay for the gamma ray treatment so they are clearing the aussie warehouse

ABC News

Perth police close down kronic parties

Posted June 17, 2011 12:25:00

Police have defended their decision to stop two Perth venues from hosting parties for users of the synthetic cannabis kronic overnight.

Kronic users were planning to gather at the The Bakery in Northbridge before the State Government's ban on kronic came into effect at midnight.

However, police shut down the venue just hours before the event was due to start.

A second event was then organised at a hotel in Inglewood but this was also cancelled after police intervention.

Assistant Police Commissioner Michelle Fyfe has told the ABC's morning program that police have a responsibility to ensure public safety.

"So it [the party] was about encouraging people to come along and binge smoke and drink," she said.

"We have enforcement responsibilities under the Liquor

100% Aussie Legal Kronic Now Available!

BLACK LABEL – our new, 100% legal blend. You've been calling for it, and we've delivered – in response to demand, we've developed a new custom blend of Kronic for the Australian market. Containing no banned substances, the latest in our line of premium, home-grown smoking blends will deliver you a smooth, haze-filled blaze. The height of innovation, Black Label combines a fruity tropical flavour with a smooth long-lasting duration.

Its delicious flavour and aromatic quality makes it the perfect smoke for those looking to have some haze-filled fun and the long lasting impact is made to satisfy. With all our products, we recommend starting slow – just a few tokes, and letting the effect come to you – with Black Label, we assure you it will.

With a long lasting duration and that Kronic feel you know and love, Black Label is the perfect way to smoke up, toke up and take life a little less seriously.

Reasons for use (Barratt & Winstock, 2015)

- 93% of Australian's would prefer to smoke natural cannabis to synthetic cannabis
- Of those who preferred it to natural Cannabis, why did they prefer it?
 - More intense effect & shorter duration (58%)
 - Easier to get than cannabis (19%)
 - Avoid Urine Screens (15%)

What about those who were smoking that didn't prefer it to natural cannabis?

Marginalised populations

“Our [outreach] team have noted when we're going to squats and shooting galleries is that there is often quite a bit of packaging from synthetic cannabinoids there and [homeless] population where I think the use of synthetic cannabinoids is higher than the general population . . . if you're highly itinerant, if you're sleeping rough, if you're couch surfing around the place, it might be hard to maintain a relationship with a regular cannabis dealer but if you know that [a local shop] will sell you this stuff under the counter then you've got a reliable, consistent source” (Perry, 2018)

“Rogue Researchers”

Mix of 25C-NBOMe, 4-FA and MDMA sold as MDMA in Melbourne, Australia

by Tronica

Published on 03-02-2017 07:50

24 Comments 

On the weekend 15-16 January 2017, there was a spate of poisonings, hospitalisations and deaths that have been associated a batch of capsules that were reportedly sold as MDMA or Ecstasy. Punters at Revolver nightclub and other clubs on Melbourne’s Chapel Street were affected.

The contents of these caps appeared damp, more like a brown sugar consistency than crystals or powder.
